DETAILED ACTION

This is in response to the Applicant's amendment received February 26, 2001 (paper number 13). Applicant has amended the claims to more clearly recite nucleotide sequences. In view of the recitation of multiple nucleotide sequences, the following election/restriction is further applied to the elected group. A search of the elected sequence will be conducted and an action on the merits will be submitted upon election of a sequence (see below).

Election/Restrictions

The claims read on patentably distinct complex sequences. Each complex sequence is patentably distinct because they differ in nucleotide sequence and a separate and distinct search is necessary for each sequence, and a restriction is applied. Applicants must elect a single sequence.

Examination will be restricted to only the elected sequence.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
